Summary

Junior Software Engineer known for strong critical thinking, good decision-making, and adaptability in fast-paced environments. Experienced in building web and mobile applications using React, TypeScript, Capacitor, Node.js, Laravel, and MySQL. Skilled at creating responsive, user-friendly systems and integrating backend APIs, with a focus on problem-solving and teamwork. Passionate about learning new technologies and contributing to innovative projects.

Education

Polytechnic University of the Philippines – Quezon City

Bachelor of Science in Information Technology

Quezon City, NCR

2021-2025

Relevant Coursework: Data Structures and Algorithms, Web Development, Database Administration, Systems Analysis and Design, Applications Development and Emerging Technologies, Capstone Project

Bansud Institute Inc.

General Academic Strand

Bansud, Oriental Mindoro

2017-2019

Work Experience

Hiraya Tech (Junior Software Engineer)

May 2025 – Present

- Contributed to the development of hybrid mobile applications using React, TypeScript, and Ionic Capacitor.
- Maintained and enhanced SaaS web applications through feature development, bug fixing, and REST API integration.
- Contributed to the development of a Building Energy Management System (BEMS) with real-time dashboards and HVAC visualizations.
- Developed an interactive diagram editor using React Konva to automate layout creation and reduce manual setup.
- Contributed to and maintained map-based features using Leaflet, OpenStreetMap, Google Maps, and MapLibre.

Projects

BNHS - Student Information System (Capstone)

August 2024 – February 2025

- Developed a student records management system to manage and securely store student profiles and academic history using a MySQL database.
- Implemented a responsive frontend using React.js and a Node.js backend to deliver a smooth, real-time user experience.

SyncTasks - Project and Task Management System

March 2024 - July 2024

- Developed a collaborative project and task management system using Node.js, React.js, and MySQL.
- Implemented real-time notifications with Socket.io to enhance team communication.
- Integrated machine learning models using Flask to recommend task priority levels, improving productivity and workflow management.

Student Registration and Admission Management System

November 2023 - February 2024

- Developed a system to manage student admissions, enabling efficient tracking and processing of applications using Laravel, React.js, and MySQL.

Skills & Interests

Programming: Laravel, Nodejs, ExpressJs, ReactJS, Typescript, TanStack, Ionic Capacitor, Mysql, PostgreSQL, Git and Github, Socket.io

Soft skills: Critical thinking, Decision-making, Adaptability

Language: English and Filipino

Interests: Web Development, Building Personal Projects, Learning New Technologies
